| • VMware Administration | • VM-SRM /RP4VM | • VCF |
| • HCX | • ITIL Certified | • NSX |
| • Windows server | • MS-Excel | |

Projects Details**Oct 2024 to present****Client: "DNB Bank"****Roles: System administrator.****Team: VMware migration****Responsibilities:**

- **VCF Migration:** Migration of virtual machines from VMware on-premises infrastructure to VMware Cloud Foundation (VCF), ensuring minimal downtime and seamless transition.
 - Collected and analyzed VM inventory data to assess compatibility, resource requirements, and migration readiness.
 - Validated network connectivity and application dependencies using VMware Aria Operations for Networks (vRNI), identifying potential bottlenecks and optimizing network flow.
 - Designed and implemented NSX firewall rules to secure east-west and north-south traffic, aligning with enterprise security policies and compliance standards.
 - Executed bulk VM migration using VMware HCX, leveraging mobility groups and service mesh for efficient and scalable workload transfer.
 - Collaborated with cross-functional teams including network, security, and application owners to ensure successful cutover and post-migration validation
 - Documented migration procedures and provided knowledge transfer to operations teams for ongoing support.
- **VCF Upgrade:** The end-to-end upgrade of VMware Cloud Foundation from version 5.2.2 to 5.3.0.0 with dell team, ensuring zero disruption to production workloads across compute, storage, and network domains.
 - Upgraded SDDC Manager, NSX, vCenter, ESXi hosts, and vSAN clusters in a staged and validated approach, adhering to VMware's release guidance and interoperability matrix
- **HCX Upgrade:** Successfully upgraded VMware HCX from version 4.10.1 to 4.11 across source and destination sites, ensuring uninterrupted migration services and platform stability.
 - Performed pre-upgrade health checks, compatibility validation, and service mesh assessments to ensure readiness and minimize risk.

-Upgraded HCX Manager, Interconnect appliances, Network Extension appliances, and WAN Optimization components with zero downtime to active migrations.

July 2020 to Sep 2024

Client: "DNB Bank"

Roles: System administrator.

Team: VMware Wintel

Responsibilities:

- **VMware vSphere:** Implement virtualization solution based on VMware vSphere 6.5, 7.0 and 8.0 Implementing DR solutions with Site recovery manager.
 - Upgraded ESXi host from ESXi 6.5 to ESXi 7.0 as well ESXi 8.0 using VMware upgrade management tool.
 - vCenter appliance server's upgrade
 - Apply patches to all ESXi hosts in environment whenever required increasing CPU, RAM or virtual machines as per client requirement.
 - Troubleshooting ESXi servers, Host, cluster and VM related issue.
 - Migration of VM's from one vCenter to another
